29 June 1964
Copy 1

MEMORANDUM FOR: Chief, Defensive Systems Division, CGI

ATTENTION:

THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Sary Shagan Graphics

REFERENCES: (a) Requirement C-SI-4-81,358
(b) CIA/PID Project C 795-64

Reviewed by NGA.

1. This memorandum is in response to your requirement dated 1 May 1964 requesting glossy prints of the best (not necessarily the most recent) photo coverage of all facilities at Sary Shagan, including each of the instrumentation sites. Consultation with Miss Fisher brought out a further requirement for line drawings of Radar Site 1 (HEN HOUSE) and its adjacent unidentified structure and the tower mounted dish at Launch Complex B.

2. Photographs can be oriented in a publication so that north is generally toward the upper portion of the page when viewed by the reader. However, in some cases shadows are very prominent or a discernible amount of obliquity can be seen. It is usually advisable to have shadows falling toward the viewer; however, when the view is not vertical, it is necessary to orient the photograph so the perspective is natural, with displacement being away from the viewer. Therefore, all attached photographs have had identification labels attached to facilitate proper orientation in your publication. As north arrows are essential, they also have been added to all photographs.
